### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. The indicated allowability of claims 1-2, 4-12, 14 and 25-33 is withdrawn in view of the prior art of record as follows and this office action is made new non-final:

#### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-2, 4-12, 14 and 25-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kleinert (US 6,868,553). Kleinert discloses a protective glove with a base layer made of clothing having a plurality of pads (522a, 522b) with one placed over another are stitched about bones or joints of the hand, col. 10, lines 28-35. as shown in figure 9. The plurality of pads are smaller than the base layers being attached thereto which corresponds to the nerves or bones as shown in figure 8A, 8 and 10. The protective layers/packs are encased within a removable cover material (502A). The glove also has rigid stalls/splints (116, 514, 516) as shown in figure 5. However, Kleinert does not show the plurality of protective foam pad being attached by hook and loop material.

Art Unit: 3765

It would have been obvious to one skilled in the art that the plurality of pads of Kleinert attached to the base fabric of the glove by stitching is impermanent that can be substituted with hook and loop material, or other detachable fastening means in order to allow worn or damaged pads to be easily replaced or as required for a particular application thereof.

In addition, it is obvious that the plurality of foam pads of Kleinert can be substituted with gel, hot/cold packs, or other resilient materials without compromising the aspect of the device being able to dissipate force of impact.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.
